

Over Fascia Ventilator

CODE **G1200N**

Description:

The G1200N Over Fascia Ventilator is designed to discreetly ensure a positive airflow into the roof space between the felt and the fascia board, making it ideal for new build and re-roofing situations. It can also be fitted in a mono roof abutment detail (see sheet 2).

The G1200N consists of evenly spaced opening specifically sized to prohibit large insects gaining access but wide enough not to be blocked by debris, paint or water droplets (See BS5250 section 6).

Fitting Instructions:

The G1200N Over Fascia Ventilator (A) should be nailed to the top of the fascia board through the fixing holes provided along the full length of the eaves as shown.

Use in conjunction with other products from the Manthorpe range to provide a complete roof ventilation system.
